

**EXPLANATION**

**ISOPACHS OF THE FRUITLAND ZONE B COAL BED** - Showing thickness, in feet. Isopach interval 3 feet (1.5 meters). Isopachs long dashed where inferred, short dashed where projected through noncoal-bearing area.

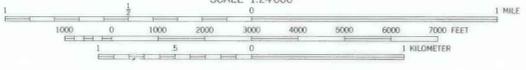

**DRILL HOLE** - Showing thickness of the Fruitland zone B coal bed, in feet.

**TRACE OF COAL BED OUTCROP** - Showing symbol of name of coal bed and coal thickness, in feet, measured at triangle. Arrow points to coal-bearing area. Dashed line indicates inferred outcrop. Trace of coal bed outcrop modified (from original data source) to fit modern topographic map.

To convert feet to meters, multiply feet by 0.3048.

Fruitland coal beds isopached as a single bed on this map are equivalent in stratigraphic position but may not be continuous.

Base from U.S. Geological Survey, 1966
